CONTENTS

Activities of the E.O. Paton Chinese-Ukrainian Welding Institute ........................................... 2

SCIENTIFIC AND TECHNICAL

Belyavin A.F., Kurenkova V.V., Fedotov D.A., Saly S.G. and Shcherbinin A.P. Extension of the life of GTK 10-4 working blades from EI 893 alloy after long operating period .................. 8
Liang Wang, Yong Hu, Shiying Song and Jianhua Yao. Influence of electric-magnetic composite field on WC particles distribution in laser melt injection ................................................. 24
Makhnenko O.V., Mirzov I.V. and Porokhonko V.B. Modelling of residual stresses, radiation swelling and stressed state of in-service WWER-1000 reactor baffle ....................... 32
Babinets A.A. Properties of high-alloyed metal deposited using electroslag two-strip method ............................................................... 39

INDUSTRIAL

Makhlin N.M. Improvement of electron devices for initial and repeated ignitions of alternating current arc ............................................. 43
Burlaka V.V., Gulakov S.V. and Podnebenyaya S.K. State-of-the-art inverter power sources with increased power factor ................................................. 48
